## Summary

I love building solutions with measurable impacts. I thrive on teams composed of people with diverse backgrounds. I deliver technology that enables a more connected, educated, and healthy world.

## Employment

### Senior Engineering Program Manager

Apple, Cupertino, California, Nov 2018 – Current

- Joined the Apple Maps Urban Experience team to lead the cross-functional Indoor Maps program and led the launch of the IMDF specification, a standard for Indoor Maps on iOS and the web, at WWDC19.

### Technical Program Manager

Amazon, Seattle, Washington, Jan 2016 – Jul 2018

- Developed the technology project intake and prioritization process for Amazon's Sustainability organization while facilitating long-range and release planning across multiple agile engineering teams.
- Led the technical roadmap for the Social Responsibility team and delivered a Responsible Sourcing system that manages thousands of complex CSR audits for all lines of business at Amazon.

### Technical Program Manager

Amazon Web Services, Seattle, Washington, Jul 2012 – Jan 2016

- Automated training for over 500 employees globally on the AWS Content Management System.
- Coordinated the marketing team's pricing program for all AWS offerings, ensuring that calculator apps and website pricing tables were accurate and understandable for millions of customers.

### Web Developer

CoMotion at the University of Washington, Seattle, Washington, Feb 2011 – Jun 2012

- Deployed a Canvas LMS, a Wordpress marketing site, and a custom Ruby on Rails web app.
- Managed on-site and cloud infrastructure for UW CoMotion.
